# GENERAL INFORMATION:

## Ring Back Systems

A fairly new system of operation for database telephone accesses is Ring-Back; in these systems you should dial the number, let the phone ring once, then replace the handset. Dial the number again, and on this call the computer will answer. If you allow the phone to keep ringing the first time, the subscriber may answer himself. This system avoids tying up phone lines unnecessarily.

TBBS LONDON 01-348-9400 Ring-Back system. Hours Mon-Fri 10pm-1am; weekends 2pm-1am.
